

ABDUL NIZER

AI Engineer Trainee | Python • IoT

Kerava, Finland • 0413633581 • [LinkedIn](https://linkedin.com/in/abdulnizer): <https://linkedin.com/in/abdulnizer> • [Github](https://github.com/Abdul7602): <https://github.com/Abdul7602>

PROFILE

BSc graduate in Information Technology (IoT) with two shipped AI products built on the Anthropic API. Interested in AI engineering, specifically how models are integrated, deployed, and served in real systems. Experienced in Python, robotics, and IoT.

TECHNICAL SKILLS

AI & Generative AI: Anthropic API, Prompt Engineering, Large Language Models (LLMs), Server-Sent Events (SSE), Groq API, Retrieval-Augmented Generation (RAG)

Programming: Python, JavaScript, Java, C++, HTML, CSS

IoT & Embedded: Raspberry Pi, Arduino, PlatformIO, Sensor Integration

Robotics: ROS 2, KUKA LBR iiwa 14, OptiTrack Motive

Tools: Git, GitHub, Docker, Visual Studio Code, Render

AI PROJECTS

Then - Personal AI Clarity Companion

2026 – Present

- Built a full-stack AI companion using the Anthropic Claude API with real-time streaming via Server-Sent Events. Pure Python server, zero external dependencies.
- Implemented a ghost memory system that extracts personality observations across conversations to personalise future responses.
- Deployed live on Render; supports Anthropic and Groq APIs.

Code: <https://github.com/Abdul7602/then>

Crystal Career - AI-Powered CV Analyser

2026 – Present

- Built a web tool that analyses CVs and provides tailored feedback using the Anthropic API, helping users align their profile with target roles.
- Handles structured reasoning over uploaded documents with a lightweight Python backend; deployed on Render.

Code: <https://github.com/Abdul7602/clearcv>

KUKA iiwa14 Robotics Research • University of Eastern Finland

Feb 2025 – Dec 2025

- Programmed a KUKA iiwa14 collaborative robot using ROS 2 for precise probe positioning in a university research context.
- Integrated Opti Track Motive motion-capture system
- Documented reproducible launch configurations to support ongoing research.

Code: https://github.com/Abdul7602/kuka_robot

EDUCATION

BSc in Information Technology (IoT) • Savonia University of Applied Sciences, Finland

Oct 2022 – Dec 2025

Diploma in Information Technology • SLIIT, Sri Lanka

Sep 2020 – Sep 2022

CERTIFICATIONS

- Python - Udemy | 2024
